No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                          1035

/dev stage="1, 5 and 15 days newborn"
/lab_host="DH10B (T1 phage resistant)"
/clone lib="NIH BMAP GM0"
/note="Organ: Brain; Vector: pXX-Asc; Site_1: ECOR I;
Site_2: Not I; The library was constructed according
Snaldo, Lennon and Soares, Genome Research, 6:791-806,
1996. Denatured RNA was size fractionated on a 1% agarose
gel:First strand CDNA synthesis was primed with Oligo-dr
primer containing a Not I site.Double strand cDNA was size
selected according to mRNA size fraction, ligated with EcoR
I adaptor, digested with NotI and then cloned
directionally into pXX-Asc vector. The library tag
sequence located between the Not I site and the polyA tail
is CGAACTGAAT. This library was created for the University
Iowa Brain Anatomy Project (BMAP): 'Gene Discovery in the
Developing Mouse Nervous System', supported by National
Institute of Mental Health (NIMH), Hemin Chin, Ph.D.,

This is the 5' sequence of the clone insert Clone from S. Wiemann,
Molecular Genome Analysis, German Cancer Research Center (DKFZ);
Email s.wiemann@dkfz-heidelberg.de; sequenced by BMFZ (Biomedical
Research Center at the Heinrich-Heine-University,
Duesseldorf/Germany) within the cDNA sequencing consortium of the
German Genome Project. This clone (DKFZ0459MIS38) is available at
the RZPD in Berlin. Please contact the RZPD: Ressourcenzentrum,

This EST is a consensus sequence obtained from a Phrap assembly of
4 cDNA libraries. The consensus sequence is submitted because SNP
data in the publication 'Detection of sequence polymorphisms in red
junglefowl and White Leghorn ESTs', is reported with reference to
positions in the Phrap consensus sequence.
Seq primer: (5'-end) M13 reverse.

//rotou=="Organ: Eye; Vector: prx- Asc; Site 1: EcoR I;
Site 2: Not I; The library was constructed according
Bonaldo, Lennon and Soares, Genome Research, 6:791-806,
1996. Denatured RNA was size fractionated on a 1% agarose
gel.First strand cDNA synthesis was primed with oligo-dT
primer containing a Not I site. Double strand cDNA was
size selected according to mRNA size fraction, ilgated
with EcoR I adaptor, digested with NotI and then cloned
directionally into prx-Asc vector. The library tag
sequence located between the Not I site and the polyA tail
is TTATTGAAGT. This library was created for the University
lowa Brain Anatomy Project (BMAP): 'Gene Discovery in the
Developing Mouse Nervous System', supported by National
Institute of Mental Health (NIMH)."
